Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a valve with a lock, classified in class 137, subclass 385+.
 - II. Claims 13-17, drawn to a method of assembly of a fluid system including a meter, classified in class 137, subclass 15.01+.
 - III. Claims 18-22, drawn to a meter including assembly elements, classified in class 137, subclass 315+.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of assembly can be used to make a fluid system other than that recited in the claims of Group I. For example the claims of Group I are drawn to a lock for a fluid valve and the claims of Group II are drawn to assembly steps for a fluid meter system. Similar remarks apply to the claims of Groups II and III (i.e., assembly claims, and a meter including elements which are combined to define a fluid system including a meter, respectively).
4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
